Cost: \$25

Students and preservice teachers: \$10

Trish Goddard, Featured Speaker

Trish Goddard has experience with and a passion for the Common Core State Standards for Mathematics. After 18 years in middle and high school math classrooms, Trish worked for the Missouri Assessment Program as a Regional Facilitator for Math. The past three years she has presented and worked extensively within Missouri and nationally to promote and clarify the changes in K-12 mathematics education, including attending CCSSO math meetings and assisting in the writing of Smarter Balanced Achievement Level Descriptors.

Trish's presentation will provide a wealth of information about the assessments associated with implementation of the Common Core State Standards for Mathematics.
